Introduction

Although statistical information for the Northwest Territories serves an important role in describing trends in demographic, social and economic conditions, these territorial indicators do not always reflect some of the differences that exist among communities in the Northwest Territories.

This document is intended to provide a summary of current selected demographic, social and economic statistics for areas of the Northwest Territories and its communities. Although a wide variety of subject areas are covered, the document is not intended to contain all community information that is available. Sections included in the profile are:

- population estimates
- vital Statistics
- size of household
- household tenure
- family structure
- core housing need
- crime & crime rates
- income assistance
- traditional activities
- aboriginal languages
- education levels
- historical labour force activity
- selected 2006 employment rates
- summary of 2006 labour force activity
- employment profile
- total personal income
- employment income
- income distribution
- family income
- prices
- community living
- environment

The document is organized into four sections. Following this section, the second section contains the information for each NWT community. In this section communities are organized alphabetically by region. The third section contains same socio-economic information for three aggregations of communities: (i) regional data; (ii) communities summarized into categories associated with the socio-economic agreements signed between the GNWT and the diamond industry, and (iii) community type. The final section of the report describes the communities that are included in each of the aggregations presented with the regional data and provides sources and definitions for the variables included in these summaries.

If statistical information for NWT communities is required that is not contained in this document, it is recommended that users visit the NWT Bureau of Statistics web site at http://www.statsnwt.ca or call (867) 873-7147.

Variables and Sources

Population

Population and Historical Population: NWT Bureau of Statistics, GNWT. Estimates are calculated by allocating the demographic components of growth, down to a community level. Sex, age and ethnicity estimates developed by NWT Bureau of Statistics.

Population Dependency Ratio: NWT Bureau of Statistics, GNWT. Ratios for < 15 years refer to the number of people less than 15 years of age divided by the number of people between the ages of 15 and 59. Ratios for 60 years and older refer to the number of people 60 years of age or older divided by the number of people between the ages of 15 and 59.

Average Annual Growth Rate: NWT Bureau of Statistics, GNWT.
Average annual growth rate (AAGR) is calculated as:

$$AAGR = \left(\sqrt[13]{\frac{Pop_{2016}}{Pop_{2005}}} - 1 \right) * 100$$

Population Projections: NWT Bureau of Statistics, GNWT. Population projections incorporate assumptions regarding fertility, mortality & migration patterns. These assumptions are reflective of historical patterns, as well as recent trends observed for the Northwest Territories.

Health & Vital Stats

% of Population that Smoke: NWT Bureau of Statistics, GNWT. Refers to the percent of people 15 years of age or older that smoke.
